01

FORMULA BHARAT REGISTRATION

Team Srijan is pleased to announce its registration for Formula Bharat 2027, starting strong in the Rulebook Quiz.

02

MANUFACTURING STATUS

The TSI - 26 is taking shape with major work progressing across bodywork, cockpit, pneumatics, brakes, and final fitment.

03

FIRST VEHICLE TEST

TSI-26 successfully completes its maiden test run.

04

CSR SUPPORT SPOTLIGHT

Metalwork Industries Limited extends valuable support to Team Srijan through CSR funding.

05

OUR SPONSORS

A special acknowledgment to our valued sponsors.

FORMULA BHARAT 2027

- Formula Bharat Rulebook Quiz

Team Srijan Announces Participation in **FORMULA BHARAT 2027**

Success in motorsport is not built overnight. It is built through discipline, preparation, teamwork, and the ability to stay consistent when it matters the most.

For several weeks before the Formula Bharat Rulebook Quiz, the team followed a dedicated preparation routine. Every day, members came together to study, revise, and discuss the rulebook in detail. The preparation was not limited to a few individuals; every sub-team was actively involved and was given specific sections related to their domain.

To make the preparation stronger, daily mock quizzes were conducted within the team. These quizzes helped members practice under pressure, improve speed and accuracy, and identify areas that required more revision. After every mock session, the team discussed the answers, corrected mistakes, and refined its understanding of the rules.

C06	Team Srijan	Birla Institute of Technology, Mesra	Jharkhand	India
-----	-------------	--------------------------------------	-----------	-------

This consistent effort reflected in the final result. Team Srijan scored 9/10 in the Formula Bharat Rulebook Quiz and secured 6th Place out of 42 teams in the Combustion Category.

MANUFACTURING STATUS

- The nose cone and side pods have been successfully manufactured and are now being installed on the vehicle. Alongside this, the team is manufacturing the side panels, with careful attention to fitment, finish, and structural alignment.
- Seat manufacturing and installation have also been carried out, with attention given to driver positioning, safety, ergonomics, and rule compliance.

- The mounting of the pedal assembly has been fixed, carefully considering both rulebook requirements and driver comfort, to ensure reliable control and accessibility inside the cockpit.
- On the powertrain side, the pneumatic gear shifting system is functioning properly, and the fuel tank has been successfully installed. Shifting time is reduced and the system looks robust, we are looking forward to verify the capacity requirements for endurance run.

MANUFACTURING STATUS

- The braking system is now fully functional. Brake bleeding has been completed and verified to ensure proper brake response, reliability, and safety during testing and competition conditions.
- The Vehicle Dynamics sub-team is working in full force on the suspension setup. Fine tuning is underway, alongside corrections to the vehicle's static wheel angles, including camber, toe, and caster.

Our Formula Student vehicle is now in its final manufacturing phase, with all remaining tasks being completed simultaneously across sub-teams. As every component comes together, We continue to move forward with precision, discipline, and determination as the car approaches its final assembled form.

FIRST TEST RUN SUCCESSFULLY COMPLETED

A major milestone was achieved on 21st June 2026, as Team Srijan successfully completed the first test run of the car, a crucial moment that brought months of design, manufacturing, and teamwork together on the ground. The run validated key systems including the powertrain, braking, steering, drivetrain, and overall vehicle integration.

More than just a functional check, it served as a strong confidence boost for the team, offering valuable feedback for the next stages of testing and confirming that Team Srijan is on track for the upcoming competitions.

Seeing the car move under its own power for the first time reminded us why every late night in the workshop was worth it.

First ignition test of TSI-26

Metalwork Industries Limited

Team Srijan is proud and grateful to announce that Metalwork Industries Limited has extended monetary support to the team through CSR funds and has officially joined us in our current competition campaign.

Founded in 1992, Metalwork Industries has established itself as a leader in precision manufacturing, serving some of the world's most respected OEMs and Tier 1 suppliers, with its headquarters in Jamshedpur, India.

The company is an engineering-focused component manufacturer specialising in highly intricate, precision-engineered components, primarily for the automotive industry. Its portfolio spans vibration dampers, flywheel assemblies, pulleys, main bearing caps, and other custom-engineered parts, supplying global names such as Ford, Renault, Cummins, John Deere, Nissan, and MAN, with exports accounting for over half of its sales. Backed by more than three decades of engineering experience, a workforce of 200+, and the capacity to supply over a million precision parts every year, the company has also diversified into railways, agriculture, marine, and defence, and collaborates with IIT Kharagpur on R&D. It was recognised as MSME of the Year in 2023-24.

Team Srijan thanks Metalwork Industries Limited for their continued support as we push forward toward SUPRA SAE 2026 and Formula Bharat 2027.

We are honoured to have them with us on this journey.

Final Note

We extend our sincere gratitude to all our alumni, faculty advisors, sponsors, supporters, and well-wishers who continue to guide and encourage us. Their support has always been one of the strongest pillars of Team Srijan.
